2CRSI, experts in providing customized servers to industry, independent software vendors (ISVs), and data centers, prides itself on its customer-centric focus and especially on its commitment to providing outstanding service and support to its more than 500 diverse clients across the globe. As an Intel Technology Provider, Platinum (the highest designation awarded to Intel partners), 2CRSI is known for its commitment to quality components and superior workmanship.

With a history of sales and support to high-performance computing industries where every minute of downtime has enormous financial impact, 2CRSI has built a reputation of dependability and integrity. It is with great appreciation for the individual people of 2CRSI who spend every day contributing their talents, intellect, and commitment, that the company shares the news that after a rigorous selection process, it has been awarded a multi-year contract with a private company, a top player in a sensitive industry.

Over the last 10 years, 2CRSI has provided custom servers and appliances to industries including oil and gas, aerospace, defense, and telecommunications. 2CRSI is adept at providing the high-level, agile, reliable equipment required by rigorous industries, such as the 2CRSI-created servers used for the NH90 helicopter powerful flight simulators.

"We couldn't be more pleased to have been entrusted with this opportunity," CEO Alain Wilmouth shared. "We are proud to have been recognized as an innovative leader in the hardware industry and look forward to providing the solid, responsive products that 2CRSI is known for and following up with above-and-beyond support."

The contract means more than \$32 million for 2CRSI, for which the company will provide hardware, logistics, and support. 2CRSI Technology Sales Enablement Manager, Adrien Badina added, "We expect to provide over 4000 dedicated, high-performance servers to support the customer's applications in the next decade. We are extremely proud to have demonstrated that we have the expertise and equipment to meet their extremely high standards."
