

# NVMe Instant Unprecedented High-Speed Transfer & Performance in a Compact Form Factor

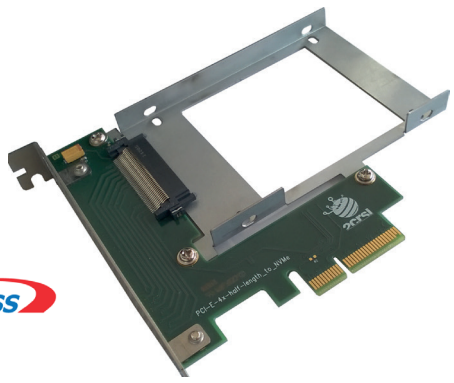

**SERVER BOOSTER**  
Up to 3.5 GB/s  
6x time faster  
compared to regular SATA SSD

Give your servers and workstations a second youth by bringing the performance of NVMe drives, without changing the motherboard or using expensive controllers. NVMe Instant solution supports standard 2,5" NVMe drives and is connected to PCIe 4x. Data transfer drastically increases up to 6 times compared to a regular SATA SSD drive (up to 3,5 GB/s). NVMe Instant is fully compatible with Intel® and HGST® drives – and all other 2,5" NVMe vendors.

## NVMe HARDWARE SPECIFICATIONS

Form Factor	2,5" NVMe drives
Interface	PCIe 3.0 x4
Dimension	FH-FL

## KEY BENEFITS

- NVMe TECHNOLOGY FOR ALL SYSTEMS**  
Non-Volatile Memory Express, a.k.a. NVMe Express (NVMe) drives have a communications interface/protocol developed for SSDs. Drives are specially designed to take advantage of the unique properties of pipeline-rich, random access and memory-based storage.
- HIGH SPEED TRANSFER**  
The NVMe Instant solution can accelerate entire systems up to 6 times faster compared to regular SSD drives, provide extremely fast I/O and deliver the full potential of non-volatile memory.
- NO DATA LOSS**  
The solution assures the same great performance than originals NVMe drives. NVMe Instant is a transparent bridge and keeps the exactly same drives specifications with no downgrade.

## APPLICATIONS
